UNIVERSITY OF ALBERTA

P R E F A C E.

THE present text-book is a new-modelling and rewriting of Swinton's *Language Lessons*. It has grown out of a double motive—first, the desire of better fitting it to fill its place as the intermediate book of the “New Language Series;” and, next, the conviction that an elementary manual might be made, which, combining the essentials of English Grammar and Composition, should find especial welcome in schools that cannot be exactly graded.

The remarkable favour with which the *Language Lessons* was received has suggested the propriety of retaining, in the new book, at least the *spirit* of the old. In that work the author's theory was set forth in the following words:—

“This book is an attempt to bring the subject of language home to children at the age when knowledge is acquired in an objective way, by practice and habit, rather than by the study of rules and definitions. In pursuance of this plan, the traditional presentation of grammar in a bristling array of classifications, nomenclatures, and paradigms has been wholly discarded. The pupil is brought in contact with the living language itself : he is made to deal with speech, to turn it over in a variety of ways, to handle sentences ; so that he is not kept back from the exercise—so profitable and interesting—of *using* language till he has mastered the anatomy of the grammarian. Whatever of technical grammar is here given is *evolved* from work previously *done* by the scholar.”

In the actual test of the schoolroom during the past four years, it has been found that the vitalising elements of the *Language Lessons* are, first, the analytic or inductive method of unfolding

the theory of language ; and, secondly, the affluence of constructive work. Accordingly, in the preparation of the present book these approved features have been retained ; but it has been the author's aim to remould the book on a more comprehensive plan, with a more systematic arrangement and a more orderly development of the subject. Wherever the book was thought to be weak—as, for instance, according to many, on the side of too great a neglect of grammatical forms—it has been “toned up ;” and, throughout, the effort has been made to produce a thorough, working *text-book*.

To the thousands of teachers who gave the old *Language Lessons* a reception exceptional in the history of text-books, the author desires to commend the *New Language Lessons* as being, in his belief, more worthy of their acceptance, and, in his hope, a nearer approach to their ideal.

WILLIAM SWINTON.

NEW LANGUAGE LESSONS.

INTRODUCTORY LESSON.

1. **Language** is the expression of thought by means of spoken or written words.

2. **Language lessons** furnish rules for speaking and writing correctly, and practice in composition. Language study is divided into two parts: I. GRAMMAR. II. COMPOSITION.

3. **Grammar** is the *science* that treats of the principles of language.

4. **Composition** is the *art* of writing correctly.

This book is divided into six parts, or sections :

- I. Classes of Words.
- II. The Sentence and its Elements.
- III. Subdivision of the Parts of Speech.
- IV. Modifications of the Parts of Speech.
- V. Syntax.
- VI. Analysis and Synthesis.

SECTION I.

CLASSES OF WORDS.

I.—NOUNS, OR NAME-WORDS.

1. *Columbus* discovered *America*.
2. *Buffaloes* roam over the *prairies*.
3. Are you fond of *skating*?
4. We love the *fragrance* of *flowers*.

Analysis.—The word “Columbus” is the name of a person ; the word “America” is the name of a place ; the word “buffaloes” is the name of certain animals ; the words “prairies” and “flowers” are names of things ; the word “skating” is the name of an action ; the word “fragrance” is the name of a quality.

Explanation.—Words that are used as names of persons, places, things, actions, or qualities are name-words. In grammar they are called *nouns*.

DEFINITION.—A noun, or name-word, is the name of anything.

NOTE.—In selecting the nouns in a sentence pupils should remember that, when it is stated that a noun is the “name of anything,” we do not mean by “thing” merely what we know by our senses, but any *object* (person, place, thing), *action*, or *quality*. “A noun is the name of anything, existing or conceived by the mind.”—(Swinton’s *English Grammar*.)

Exercise 1.

a.

1. Mention (or write) the names of all the things you see in the school-room.
2. Mention (or write) the names of five persons of whom you have read.

3. Mention (or write) the names of five places of which you have read.
4. Mention (or write) the names of five actions, as *singing*.
5. Mention (or write) the names of five feelings of the body (as *hunger*), or of the mind (as *pity*).

b.

Copy the following sentences on slates or paper, drawing a line under each *noun*.

1. Tea grows in China.
2. The oak bears acorns.
3. Cicero was a great orator.
4. Paris is the capital of France.
5. The greatest of these is charity.
6. Sometimes we see a ship.
7. Sometimes we ship a sea.

14. I fear your joy is short-lived.
15. The scent of the rose hangs round it still.
16. Go where glory waits thee ;
But when fame elates thee,
O then remember me.

c.

Mention each noun in the preceding exercise, and apply the definition of a noun :

Model : "Tea grows in China."

"Tea" is a noun, because it is the name of something ; "China" is a noun, because it is the name of something.

II.—VERBS, OR ACTION-WORDS.

1. The sun *shines*.
2. *Are you writing?*
3. *Bring me a book.*

Analysis.—The word "*shines*" tells or *states* something about the sun ; it is used in making a *statement*. The words "*are writ-*

ing" are used in asking a *question*. The word "bring" is used in expressing a *command*.

Explanation.—A word that is used in stating what any person or thing *does* or *is*, or in asking what a person *does* or *is*, or in telling another person to *do* or *be* something, is called a *verb*.

DEFINITION.—A **verb** is a word that expresses action or being.

NOTES.

I. "A verb is a word that *predicates* action or being" (Swinton's *English Grammar*). To "predicate" signifies to express, assert, or declare. This is the principal use of verbs, though they are also employed in asking questions and expressing commands.

II. A verb may consist of more than one word : as, *is learning*, *will be told*, *has been requested*. Hence, in selecting verbs, care must be taken to include all the words needed to express the *action* or *state of being* intended to be expressed in the given sentence.

III.—ADJECTIVES.

1. Bring me *that* book.
2. Here is a drove of *ten* cattle.
3. The *ripe* fruit is plucked.

Analysis.—The word "that" is added to the noun "book" to tell *which* book is meant; the word "ten" is added to the noun "cattle" to tell *how many* are meant; the word "ripe" is added to the noun "fruit" to tell what kind or *quality* of fruit is meant.

Explanation.—Words such as "that" and "ten" are said to *limit* the meaning of a noun with which they are joined. A word such as "ripe" is said to express some quality of the thing named by a noun, or to *qualify* the meaning of a noun.

A word which limits or qualifies the meaning of a noun is called an *adjective*.

DEFINITION.—An adjective is a word joined to a noun to limit or qualify its meaning.

NOTES.

I. Sometimes adjectives are used with the class of words called *pronouns*. (See definition, page 10.)

II. The words *a*, or *an*, and *the* are adjectives, because they limit (or *define*) the meaning of nouns ; but they are often called *articles*.

Explanation.—A word that in some *mode* (manner) changes the meaning of a verb, an adjective, or an adverb, is said to *modify* the word with which it is joined. In grammar a word of this kind is called an *adverb*.

DEFINITION.—An adverb is a word used to modify the meaning of a verb, an adjective, or another adverb.

2. *Aha!* papa, I have found you out.

Analysis.—The word “*alas*” is an exclamation of sorrow ; the word “*aha*” is an exclamation of surprise and pleasure.

Explanation.—A word of exclamation denoting some sudden feeling is called an *interjection*. This literally signifies a word merely *thrown in* among the other words in a sentence.

DEFINITION.—An interjection is a word which expresses an emotion.

The following story is to be read aloud to the class, and pupils are then to write what they can remember of it. (This is called an *abstract from memory*.)

DON'T GIVE TOO MUCH FOR THE WHISTLE.

When I was a little boy about seven years old, my friends, on a holiday, filled my pockets with spending-money. I went

directly towards a shop where toys for children were sold ; and being charmed with the sound of a whistle, in the hands of another boy that I met by the way, I offered him all my money for it. I then came home, and went whistling over the house, much pleased with my whistle, but disturbing all the family. My brothers, sisters, and cousins, hearing of the bargain I had made, told me I had given four times as much for the whistle as it was worth. This put me in mind what good things I might have bought with the rest of the money ; and they laughed at me so much for my folly, that I cried with vexation. This little event was afterwards of use to me, for often, when I was tempted to buy some unnecessary thing, I said to myself : ‘ Don’t give too much for the whistle ; ’ and so I saved my money.—*Benjamin Franklin.*

SECTION II.

THE SENTENCE AND ITS ELEMENTS.

IX.—DEFINITION OF THE SENTENCE.

Fire burns.

Analysis.—Here something is named—"fire." Something is said about fire—(it) "burns."

Explanation.—Whenever we *say* something *about* anything, we express a thought. A thought expressed in words is called a *sentence*.

DEFINITION.—A sentence is a combination of words expressing a complete thought : as—

1. Rain is falling.
2. The stars are distant.
3. The merry schoolboy whistles loudly.

RULE FOR CAPITALS.—The first word of every sentence should begin with a capital letter.

NOTE.—A sentence is made up of *words* ; but words thrown together *at random* do not form a sentence : they must mean something before they can be a sentence. A pupil was told to write a sentence on *air*. She wrote these words : "The air that we breathe." Now these words are not a sentence, for the reason that they do not make any complete statement. They might easily be converted into a sentence by saying, "The air that we breathe is sweet," or "The air that we breathe is a fluid."

Exercise 9.

Supply such words as will convert into *sentences* the following incomplete collections of words.

MODEL: "In 1492 Columbus *discovered America.*"^a

1. In 1492 Columbus
2. The earth, in $365\frac{1}{4}$ days
3. A band of robbers
4. The story of Robinson Crusoe
5. The city of New York is
6. The Empire of China

9. is the largest city in the world.
10. tell us the time of day.
11. is an improving study.
12. travel over the desert.
13. live in Africa.

X.—KINDS OF SENTENCES.

I. A sentence may take one or other of these forms :

1. **Declarative.**—It may simply express a statement, or *declare* something: as, "The earth rotates." Such a sentence is called a *declarative* sentence.
2. **Interrogative.**—It may ask a question: as, "Will you go?" Such a sentence is called an *interrogative* sentence.
3. **Imperative.**—It may express a command: as, "Take care." Such a sentence is called an *imperative* sentence.
4. **Exclamative.**—It may express an emotion: as, "How softly the moon shines!" Such a sentence is called an *exclamative* sentence.

II. RULE FOR TERMINAL MARKS.*—A declarative or an imperative sentence is closed with a period (.) ; an interrogative sentence, with an interrogation point (?); an exclamative sentence, with an exclamation point (!).

* A terminal mark is a mark of punctuation placed at the end or *termination* of a sentence.

Exercise 10.

a.

Copy on slates or paper the following sentences. Exchange exercises for correction as to (1) spelling, (2) capitals, and (3) terminal marks.

1. The farmer mows the waving grass.
2. Tell me what you want.
3. What are you doing? Where are you going?
4. How sweet the moonlight sleeps upon this bank!
5. Our brethren are already in the field. Why stand we here idle? Is life so dear, or peace so sweet, as to be purchased at the price of chains or slavery? Forbid it, Almighty God! I know not what course others may take; but as for me, give me liberty or give me death!

I cannot play alone.

2. The big fire burns brightly.
3. Time flies rapidly.
4. The storm rages fiercely.
5. The scholars rejoice.
6. The lion roars.

XI.—SUBJECT AND PREDICATE.

Birds fly.

Analysis.—In this sentence, is anything *named*? What? Is anything *said about* them? What?

Explanation.—Every sentence, however short, must have two parts: 1. The name of what is spoken of—or the *subject*; 2. What is said of the subject—or the *predicate*.

In any collection of words, unless something *is named* and something *said about* what is named, there can be no statement, and hence no sentence.

DEFINITION I.—The subject of a sentence names that of which something is thought.

DEFINITION II.—The predicate of a sentence tells what is thought.

DEFINITION III.—A simple sentence is one that contains but one subject and one predicate.

NOTES.

I. Both the subject and the predicate may consist of many words.

II. The question, “*Who (or what) is mentioned?*” will always suggest the subject as its answer. And “*What is said of the subject?*” will give the predicate. Thus in the sentence, “The squirrel eyes the browning chestnuts,” what is mentioned? “The squirrel.” What is said of the squirrel? “Eyes the browning chestnuts.”

Exercise 11.

a.

Make sentences, using suitable pairs of the following *subjects* and *predicates*.

2. is the season of snow and ice.
3. are drawn over the snow in sledges.

 Let some of the sentences be written on the black-board, and made the basis of class-criticism. Correct according to the following directions :

1. Draw a line under each misspelled word.
2. Draw a line through each small letter that should be a capital, or capital that should be a small letter.
3. Mark a cross where a period is omitted.

XII.—ANALYSIS AND SYNTHESIS.

I. **Analysis** is the separation of a sentence into the parts or *elements* of which it is composed.

II. **Synthesis** is the process of constructing sentences from their elements.

Exercise 12.

a.

Analyse, according to the model, the following sentences :

MODEL : "Trees blossom" is a sentence, because it expresses a thought, and it is a simple sentence because it contains but one subject and one predicate. "Trees" is the subject, because it names that of which something is thought; "blossom" is the predicate, because it tells what is thought of "trees."

- | | |
|-------------------------|---------------------------|
| 1. Trees blossom. | 7. Dogs bark. |
| 2. Kings rule. | 8. Grass will grow. |
| 3. Worms crawl. | 9. Morning has dawned. |

- | | | |
|-----------------|-----------------|----------------------|
| 1. Ladies | 3. Rivers | 5. Ships |
| 2. Roses | 4. Greece | 6. The teacher |

XIII.—SIMPLE AND COMPLETE SUBJECT AND PREDICATE.

I. A thought may be expressed by means of two words—one being the subject, the other the predicate : thus—

SUBJECTS.	PREDICATES.
Birds	fly.
Fishes	swim.
Diamonds	sparkle.
Nero	fiddled.
Rome	remains.

II. When the subject consists of a single word it is called the *simple* subject ; when a predicate consists of one verb (word or words), it is called the *simple* predicate.

III. The simple subject and simple predicate often have words added to them to modify their meaning. One or more words added to another to modify its meaning is called an *adjunct*, or *modifier*; and a word thus added to is said to be *modified* or *enlarged*.

IV. The *complete* subject or predicate is the subject or predicate with all its modifiers.

1. Birds fly.

This is a sentence, with a simple subject, "birds," and a simple predicate, "fly."

2. *Some* birds fly *swiftly*.

Here the subject is modified or enlarged by the word "some," and the predicate by the word "swiftly."

3. *Some* birds of *prey* fly *very* *swiftly*.

Here the words "of prey" are added to the last subject, and "very" to the last predicate.

4. *Some* birds of *prey*, *having secured their victim*, fly *with it very swiftly to their nests*.

Here the subject and the predicate are modified or enlarged by many additional words.

SUBJECTS.

PREDICATES.

1. Birds

fly.

2. Some birds

fly swiftly.

3. Some birds of prey

fly very swiftly.

4. Some birds of prey, having

secured their victim, fly with it very swiftly to their nests.

Exercise.—In like manner, enlarge the following sentences till you make them as long as you can. Be careful to have only one subject and one predicate :

Birds study.

2. A horse ran.

XIV.—SUBJECT MODIFIED : By an Adjective.

1. Three tall soldiers passed.

2. The melancholy days have come.

Analysis.—The word "tall" modifies "soldiers," which is the

subject of the sentence; "three" limits "tall soldiers." The words "the" and "melancholy" modify the subject "days."

Explanation.—It is often necessary to modify (that is, to limit or qualify) the meaning of the noun-subject. For this purpose we may use *adjectives*. "Three," "tall," "the," and "melancholy" are adjectives.

FIRST MODIFIER.—The simple subject may be modified by an adjective.

Exercise 13.

a.

Analyse according to the model.*

MODEL: "The melancholy days have come" is a simple sentence. "Days" is the simple subject: it is modified by the adjectives "melancholy" and "the." The predicate is "have come."

1. The melancholy days have come. 2. Large bodies move slowly.
3. The grey horses ran away. 4. Dark shadows stretched across the green meadow.
5. Huge elephants live in Africa.
6. The lowing herd comes home. 7. Beautiful meadows lay below.
8. Early rising is healthful. 9. The rising sun shone through the window.
10. The wild cataract leaps in glory.

b.

Write six sentences, each of which shall contain one of the following nouns as its subject; and join one or more adjective modifiers with each subject.

1. Schoolhouse.

3. Grass.

5. Feelings.

2. Mill.

4. Peaches.

6. Doll.

* At this stage of progress the analysis is to be confined to stating the simple subject and its modifiers. The predicate may merely be named, not analysed.

XV.—ADJECTIVE MODIFIERS : Synthesis.

To a noun-subject we may join—

1. A single adjective : as, “ *Tall* trees appear.”
2. Two or more adjectives, of which one modifies the noun directly, while the others modify the noun as already modified by the nearest adjective : as, “ A *mischievous* LITTLE boy sat on the back seat.”
3. Two or more adjectives separately modifying the noun : as, “ Kate’s large, laughing, light-blue eyes danced in her head.”

Punctuation.—The following rule of punctuation applies to adjectives :

Three or more adjectives (or two if not joined by a conjunction) modifying a noun are separated by commas : as—

1. This *calm, resolute* man.
2. This *calm, cool, and resolute* man.
3. This calm and resolute man.

NOTES.

I. When a noun has joined with it two or more adjectives which do not *separately* modify it, the adjectives should not be separated by the comma. Thus, in the sentence—

“ A mischievous little boy sat on the back seat ”—

“ little ” modifies “ boy,” “ mischievous ” modifies “ little boy,” “ a ” modifies “ mischievous little boy.” Hence, as these adjectives do not *separately* modify the noun, they are not separated by the comma.

II. The adjective next to the noun is not followed by the comma.

Exercise 14.

a.

Unite each group of statements into a single sentence, using all the adjectives as modifiers of the subject.

MODEL.

A boy ran away from school yesterday :
 He was a *cross* boy.
 He was a *quarrelsome* boy.
 He was a *lazy* boy.

} = A cross, quarrelsome,
 lazy boy ran away from
 school yesterday.

 They were *blind* mice.
4. Books are nice Christmas presents :
 It is *pretty* books that are nice Christmas presents.
 It is *illustrated* books that are nice Christmas presents.
 It is *story*-books that are nice Christmas presents.
5. A king named Alfred ruled over England a thousand years ago .
 He was a *learned* king.
 He was a *valiant* king.
 He was a *much-loved* king.
6. A song cheered the soldiers :
 It was a *sweet* song.
 It was a *tender* song.
 It was a *home-like* song.

b.

Supply the comma where omitted in the punctuation of the adjectives in the following sentences.*

* Though the adjectives in these sentences are not in every instance modifiers of the *subject* noun, they illustrate equally well the rules for the punctuation of adjectives joined with the subject.

1. A grand gloomy and peculiar drama was played.
 2. A free patriotic liberty-loving people are hard to conquer.
 3. Reserved and proud haughty and ambitious, how could he be beloved by the people?

 7. Jane had a short sensible well-written well-spelled and well-punctuated composition.
 8. The condor is the largest strongest swiftest and most tireless of birds of prey.
-

XVI.—SUBJECT MODIFIED : By a Possessive Noun.

The *girl* has a book, and the *girl's* book is here.

Explanation.—The noun “girl” is used as the subject of the verb “has.” But the form “girl’s” is not used as a subject : it is joined with the noun “book” to tell *whose* book we are speaking of.

The form “girl’s” is made from the form “girl” by adding the letter *s* with the mark called an apostrophe (*'*) before it. This form of the noun is named the *possessive case*.

DEFINITION.—The possessive case is that form which a noun has in order to denote ownership or possession.

SECOND MODIFIER.—The subject may be modified by a noun in the possessive case.

NOTES.

I. As a preparation for writing possessive forms in the exercises given below, the pupil should carefully read over the rules for forming the possessive case singular and plural * (see page 84).

* Though, in the order of development, the consideration of the possessive case belongs properly under Section IV., where the full treatment will be found, it seems necessary for practical reasons that the mode of forming the possessive should here be taken up by anticipation.

II. For practice copy the following :

SUBJECT FORM, OR CASE.

POSSESSIVE FORM, OR CASE.

	<i>Singular.</i>	<i>Plural.</i>
lion	lion's,	lions'
scholar	scholar's,	scholars'

MODEL : "Our country's history is full of interest."

This is a simple sentence : "history" is the simple subject ; it is modified by "our," and by "country's," a noun in the possessive case. "Is full of interest" is the predicate.

XIX.—SUBJECT MODIFIED : By a Noun in Apposition.

William, the young *blacksmith*, shoes horses. ✓

Analysis.—What is the simple subject of this sentence? What use has the word “blacksmith”? The word “blacksmith” explains *which* “William” is meant.

Explanation.—When a noun denoting the same person or thing as another noun is placed beside it to explain its meaning, the explanatory noun is said to be *in apposition* with the word which it explains.

DEFINITION.—A noun in apposition is a noun joined to another noun to explain it.

THIRD MODIFIER.—The subject may be modified by a noun in apposition.

Exercise 16.

Select the nouns in apposition, and mention with what word each is in apposition.

MODEL: The noun "father" is in apposition with the noun "Washington."

1. Washington, the father of his country, was the first president of the United States.
2. The Emperor Napoleon * died at St. Helena.
3. Milton, the illustrious poet, was blind.
4. Next came Thomas, the boy who carries the mail.
5. That faithful animal, the horse, is often abused.
6. The Somerset, a phantom ship, was swinging at her mooring.

XX.—APPOSITIVE MODIFIERS: Analysis.

Analyze according to the model the following sentences.

MODEL: Howard, the distinguished philanthropist, was beloved by all.

This is a simple sentence. The simple subject is "Howard;" it is modified by "philanthropist," a noun in apposition; "philanthropist" is modified by the adjectives "the" and "distinguished." The predicate is "was beloved by all."

1. James Watt, the inventor of the steam-engine, was born in Scotland.
2. Socrates, the Greek philosopher, was poisoned.
3. Peter the Hermit preached the first Crusade.
4. Night, sable goddess, stretches her sceptre.
5. David, the psalmist, was king of Israel.
6. That faithful animal, the dog, watches our houses.

* The noun *in apposition* generally follows the noun with which it is in apposition (called the *principal term*). But sometimes, as in this instance, the appositive comes first. To determine the principal term, inquire "What is the name of the principal object (person or thing) spoken of?"

XXI.—APPOSITIVE MODIFIERS : Synthesis.

I. A noun in apposition may itself be modified by other words.
Thus—

Wolfe, the gallant young hero, fell at Quebec.

The noun “hero” is in apposition with “Wolfe;” at the same time the appositive noun is modified by the adjectives “the,” “gallant,” and “young.” The whole appositive expression—“the-gallant-young hero”—is set off by commas from the other parts of the sentence.

II. PUNCTUATION.—Nouns in apposition, especially when modified by other words, are set off from the other parts of the sentence by the comma.

NOTE.—The two nouns are not separated by the comma if both words have become so closely connected as to form really one name : as, “Paul *the Apostle*,” “Peter *the Hermit*.”

III. Sentence-building.—The sentence—

Wolfe, the gallant young hero, fell at Quebec—

may be separated into several distinct statements : thus—

1. Wolfe fell at Quebec.
2. He was a *hero*.
3. He was a *young* hero.
4. He was a *gallant* hero.

By the reverse process, the following statements may be combined into one sentence :

Columbus was persecuted. Columbus was a <i>navigator</i> . He was an <i>Italian</i> . He was <i>great</i> .	}	=Columbus the great Italian navigator was persecuted.
--	---	---

Exercise 17.

a.

Unite each group of statements into a simple sentence, as in the model.

It is a *food*.
It is a *cheap* food.
It is a *nourishing* food.
2. Bryant wrote "Thanatopsis."
He is a *poet*.
He is an *American* poet.
He is an *illustrious* poet.
3. Benjamin Franklin learned his trade.
He was a *philosopher*.
He was a *distinguished* philosopher.
He learned his trade in the office of his brother.
His brother was a *printer* in Boston.
4. David slew Goliath.
David was the *son of Jesse*.
Goliath was a *Philistine*.
5. William the Conqueror defeated Harold.
Harold was the *Saxon king*.
6. The whale is found in the Arctic and Antarctic seas.
It is the *largest [mammal] of mammals*.
7. Coral is highly prized for ornaments.
It is a *secretion* from the body of an animal.
This animal is *called a polyp*.

b.

Copy the following piece, drawing a line under each noun which is *in apposition* :

THE BATTLE OF HASTINGS.

The English, keeping side by side in a great mass, cared no more for the shower of Norman arrows than if they had been showers of Norman rain. When the Norman horsemen rode against them, with their battle-axes they cut men and horses down. The Normans gave way. The English pressed forward. Duke William, the Norman commander, pretended to retreat. The eager English followed. Duke William's army turned again, and fell upon the English with great

slaughter. The sun rose high, and sank, and the battle still raged. Through all the wild October day the clash and din resounded in the air. In the red sunset, and in the white moonlight, heaps upon heaps of dead men lay strewn all over the ground. Harold, the Saxon king, wounded in the eye by an arrow, was nearly blind. His brothers were already killed. At length Harold, the king, received a mortal wound and dropped. The English broke and fled. The Normans rallied, and the day was lost.—Dickens' *Child's History of England*.

XXII.—SUBJECT MODIFIED : By a Phrase.

1. A thing *of beauty* is a joy forever. ✓
2. Like a glow-worm golden
In a dell *of dew*.

Analysis.—The expression “of beauty” is used to modify “thing.” We might express the same idea by using the adjective *beautiful*: “a beautiful thing.”

The expression “of dew” is used to modify the meaning of the word “dell,” and “dell of dew” signifies the same thing as *dewy dell*.

Explanation.—In each of these cases we have a noun which is joined (or *related*) by a preposition to another word. An expression of this kind is called a *phrase*. It forms a part, or *element*, of a sentence, just as if it were a single word.

DEFINITION I.—A phrase is a combination of related words forming an element of a sentence.

DEFINITION II.—A phrase which modifies the subject (or any noun) is called an adjective phrase.

FOURTH MODIFIER.—The subject may be modified by an adjective phrase.

NOTE.—Many phrases consist of a preposition and a noun. Such phrases may frequently be changed into single words: thus—

The man *in armour* = the *armoured* man (adj.).

- Our cottage *by the sea-side* = our *sea-side* cottage (adj.).
 A man *of note* = a *noted* man (adj.).
 A woman *of distinction* = a *distinguished* woman (adj.).
 A hat *with three corners* = a *three-cornered* hat (adj.).

XXIII.—PHRASE MODIFIERS : Analysis.

Analyse the following sentences :

MODEL : "The house on the hill is burnt."

This is a simple sentence : "house" is the simple subject ; it is modified by "the," an adjective, and by "on the hill," an adjective phrase. "Is burnt" is the predicate.

Exercise 19.

4. Grapes from California are much esteemed.
5. The man with the white coat has gone.
6. The light of the sun nourishes plants.
7. The bird in the bush sang sweetly.

XXIV.—PREDICATE MODIFIED : By an Adverb.

1. Alice plays *nicely*.
2. Thomas walks *here*.
3. We will come *soon*.

Analysis.—The word “*nicely*” modifies the meaning of the verb “plays,” by expressing *how* Alice plays. The word “*here*” modifies the meaning of the verb “walks,” by expressing *where* Thomas walks ; the word “*soon*” modifies the meaning of the verb “will come,” by expressing *when* we will come.

Explanation.—It is often necessary to modify the meaning of the verb in the predicate by a word expressing *how*, *when*, or *where*. For this purpose we use the class of words called *adverbs*. (See definition of the adverb, page 8.) The words “*nicely*,” “*hastily*,” and “*soon*” are adverbs.

FIRST MODIFIER.—The predicate verb may be modified by an adverb.

Exercise 20.

a.

Analyse the following sentences.*

MODEL.: “Charles was here yesterday.” This is a simple sentence:

* At this stage of progress the analysis is to include the subject and its modifiers, and the predicate verb with its adverbial modifiers.

12. Were you at Niagara?

XXV.—PREDICATE MODIFIED: Adverbial Phrase.

1. A great man lives *here*.
2. A great man lives *in this place*.

Analysis.—The word "here" is an adverb, and modifies the predicate verb "lives." The expression "in this place" is a phrase, and has the same meaning as "here:" it modifies "lives," and hence is called an *adverbial phrase*.

DEFINITION.—An adverbial phrase is a phrase which modifies a verb.*

* It will hereafter be seen that an adverbial phrase may also modify an adjective or another adverb.

SECOND MODIFIER.—The predicate verb may be modified by an adverbial phrase.

NOTE.—An adverbial phrase is generally introduced by a preposition : as, “*in the street*,” “*through the woods*.” But in some phrases the preposition is not expressed : “The war lasted *ten years*” (= *during ten years*); “we walked *thirty miles*” (= *a distance of thirty miles*). Every such expression, when it has the meaning of an adverb, is an adverbial phrase.

Exercise 21.

XXVII.—PREDICATE MODIFIED : Synthesis.

I. **Punctuation.**—The following rules of punctuation apply to adverbs and adverbial phrases :

RULE I.—Two or more adverbs or adverbial phrases in a series are separated by commas : as—

1. *Slowly, sadly* we laid him down.
2. He reads *rapidly, fluently, and correctly*.
3. He goes *from grave to gay, from lively to severe*.
4. I went from New York, through Liverpool, to Bombay, by way of Suez.

NOTE.—*Two* adverbs or adverbial phrases joined by a conjunction are not separated by commas : as, “*Slowly and sadly* we laid him down.”

RULE II. — **An adverbial phrase at the beginning of a sentence, or otherwise out of its natural order, is generally set off by a comma : as—**

1. Over the great plains, the buffalo still roams.
2. Columbus, in 1493, returned from his voyage to the West Indies.

NOTE.—In what is called the “*natural* order” of a sentence the subject comes first, the predicate verb next, and then follow all the adverbial modifiers. But this is by no means the most pleasing order. Good writers, when they employ two or more adverbial phrases in the same sentence, distribute them in such a way as to make an agreeable, harmonious whole. It is when phrases are thus out of their *natural* order, and in their *literary* order, that the rule for the comma applies.

II.—**Sentence-building.**—In the following exercise several separate statements, each containing a phrase, are to be combined into a single simple sentence : thus—

Separate Statements... $\left\{ \begin{array}{l} \text{Columbus returned from his voyage.} \\ \text{He returned from his voyage to the West Indies.} \\ \text{He returned in 1493.} \end{array} \right.$

Combined.—Columbus returned from his voyage to the West Indies in 1493.

In this sentence there are three phrases—(1) “from his voyage,” (2) “to the West Indies,” (3) “in 1493”—and they are all brought together in the predicate. The sentence would be more agreeable if arranged thus—

In 1493, Columbus returned from his voyage to the West Indies ;
or,

Columbus, in 1493, returned from his voyage to the West Indies.

DIRECTION.—Several phrases used in the same sentence should be distributed in such a way as to make the sentence most agreeable to the ear.

Exercise 23.

1. The teacher of our academy gave prizes.
He gave them *on exhibition-day*.

He landed *from his vessel*.
 7. The swallows built their nests.
This was *in the spring-time*.
They built them *under the eaves of the barn*.
The nests were built *in a long row*.
-

XXVIII.—PREDICATE WITH OBJECT.

1. Carpenters build *houses*.
2. The hunter shot a *bear*.
3. I teach *him* and he teaches *me*.

Analysis.—The noun “houses” denotes *what* carpenters build ; the noun “bear” names *what* the hunter shot. The pronoun “him” denotes *whom* I teach, and the pronoun “me” denotes *whom* he teaches.

Explanation.—In such sentences as “Birds fly,” “Fishes swim,” the verbs “fly” and “swim,” when used with a subject, as “birds,” “fishes,” express a complete meaning—they make complete statements. But when we say—

Columbus discovered

Watt invented

no complete statement is made. We wait to be told of some thing or object which Columbus discovered or Watt invented.

A word that is used to complete the meaning of a verb denoting action is called the *object* of the verb. In the examples at the beginning of this lesson, “houses” is the object of “build ;” “bear” is the object of “shot ;” “him” is the object of “teach,” and “me” is the object of “teaches.”

A verb that requires an object in order to make a complete statement is called a *transitive verb*.

DEFINITION I.—A transitive verb is one that denotes an action terminating on some object.

DEFINITION II.—The object of a transitive verb is the word or words used to complete the statement made by the verb.

Exercise 24.

The musician.	A baby.	recitation.	corn.
The carpenter.	A robin.	rattle.	violin.

2. The Egyptians embalmed bodies.
3. The minister preached a sermon.

5. James has written a letter.
6. Fools despise knowledge.
7. Physicians prescribe medicines.
8. Patriots love their country.
9. Education improves the mind.
10. Teachers hear recitations.

XXX.—PREDICATE WITH OBJECT : Synthesis.

I. **Punctuation.**—**RULE.** Three or more objects of the same verb (or two if not connected by a conjunction) are separated by commas : as—

1. Our county produces wheat, corn, potatoes, and fruit.
2. Our county produces peaches and pears.

II. **Sentence-building.**—Several statements in which the same verb is used, but with different objects, may be combined into a single sentence by using the verb only once : thus—

Milton wrote <i>Paradise Lost</i> .	} = Milton wrote <i>Paradise Lost</i> ,
Milton wrote <i>Paradise Regained</i> .	
Milton wrote several other poems.	
	} <i>Paradise Regained</i> , and several other poems.

Exercise 25.

XXXI.—PREDICATE ADJECTIVE AND NOMINATIVE.

1. Gold is *yellow*. Gold is a *metal*.

2. Alfred was *king*. Pitt was a *statesman*.

3. The boy becomes a *man*.

Analysis.—Do the words “Gold is.....” make a complete statement? They do not. We must supply some word, as “yellow” or “metal,” telling *what* gold is. In like manner the words “Alfred was,” “Pitt was,” and “The boy becomes,” make no statement until we have completed the predicate by using words to denote *what* Alfred and Pitt *were*, and *what* the boy *becomes*.

Explanation.—The verbs “is,” “was,” and “becomes” are not transitive verbs, because they do not express action; hence the words used with these verbs to complete the statement are not called *objects*.

An adjective used to complete the sense of a verb not expressing action is called a *predicate adjective*, and a noun used in the same way is called a *predicate nominative*.

DEFINITION I.—A predicate adjective is an adjective used to complete the sense of a predicate verb.

DEFINITION II.—A predicate nominative is a noun (or pronoun) used to complete the sense of a predicate verb.

NOTE.—There are not many verbs of the kind spoken of in this lesson. The one most used is the verb *to be*, which has various forms—*is, am, was, were, have been*, etc. Other verbs of this class are :

become.....as, " Mary became *queen*."
 feelas, " Velvet feels *smooth*."
 lookas, " The baby looks *happy*."
 seemas, " Success seems *secure*."
 smellas, " The rose smells *fragrant*."

COMPOSITION EXERCISES.

a.

Write an *abstract from memory* after reading the following piece :

LITTLE THINGS.

"Two men were at work one day in a ship-yard. They were hewing a piece of timber to put into a ship. It was a small piece, and not worth much. As they cut off the chips, they found a worm, a little worm, in the wood, about half an inch long. "This wood is wormy," said one ; "shall we put it in?"

"I don't know ; yes, I think it may go in : it will never be seen, of course."

"Yes ; but there may be other worms in it, and these may increase and injure the ship."

"No, I think not. To be sure the wood is not worth much ; but I do not wish to lose it. Come, never mind the worm ; we have seen *but* one ; put it in." So the wormy piece of wood was put in. The ship was made, and she looked very noble indeed. She went to sea, and for a number of years did well. But it was found, on a distant voyage, that she grew weak and rotten. Her timbers were found to be much eaten by the worms. The captain thought he would try to get her home ; but she sprang a leak. She filled with water, and soon after sank, with all the goods and most of the crew on board.

You see that a fine ship and many lives may be lost by a little worm ! And how much evil may a man do when he does a small wrong, as he did who put the wormy timber into the ship.

MODEL : “Walter visited London, and saw Hyde Park and the Thames.”

“Walter” is the name of a particular person ; “London” is the name of a particular place ; “Hyde Park” is the name of a particular object ; “Thames” is the name of a particular river.

The Alps are the highest mountains in Europe. 12. We shall have a holiday on Thursday because it is Dominion Day.

Explanation.—The name of a particular person, place, or thing is an *individual* or *special* name. It does not belong to the person, place, or thing by *nature*, but is *given* to the person, place, or thing to distinguish that one from others of the same kind.

In grammar such names are called *proper nouns*.

DEFINITION.—A proper noun is a special or individual name.

Capitals.—**RULE :** A proper noun should always begin with a capital letter.

NOTE.—A name made up of two or more words is to be taken as one proper noun : thus, New Glasgow, Dominion Day, Rocky Mountains, Lord Dufferin, Peter the Great, Oxford County, &c.

XXXIV.—THE NOUN : Common.

Select from the following examples all the nouns which are the names of all objects of the same class or kind.

MODEL : “The cat is a domestic animal.”

Examples.—1. The bud shoots forth. 2. The oak is one of the largest trees in the forest. 3. Ships spread their sails. 4. Cows eat grass and give us milk. 5. Birds build nests. 6. Great changes have taken place. 12. Sail on, proud ship!

Explanation.—Many names are not individual or special names, but names of every one of a class or kind. Thus, *boy* is not a name denoting only a particular one : it belongs to all boys *in common*, and is a general name, or class name, which denotes every individual belonging to the boy-kind.

Such names are called *common nouns*.

DEFINITION.—A common noun is a general or class name.

NOTE.—A **collective** noun is a noun denoting a collection of individuals considered as forming one whole or body : thus, *army, fleet, jury, committee, &c.*

XXXV.—THE NOUN : Abstract.

Explanation.—Some nouns are the names, not of things, but of *qualities* belonging to a number of things. These qualities we cannot perceive by the senses, but we can think of them and speak about them. Thus many things are *sweet*, and thinking about this quality apart from the things themselves, we name it *sweetness*.

These names of qualities are called *abstract nouns*, because we consider the quality apart from the things themselves.

Names of actions are a kind of abstract noun.

DEFINITION.—An abstract noun is the name of some quality or action.

NOTE.—Most abstract nouns of quality are formed from adjectives.

I reside in Toronto, County of York, Ontario. My name is Emily Faithful, and I am ten years of age.

Yours truly,

Emily Faithful.

XXXVIII.—THE PRONOUN: Personal.

Select from the following examples all the words that are used for the name of the person speaking or spoken to, or that stand for nouns.

MODEL: 1. "I am glad that you have come." 2. "Frank likes his dog and it likes him."

The word "I" is used for the name of the *person speaking*; the word "you" is used for the name of the *person spoken to*; the word "it" stands for the *noun* "dog"; the word "him" stands for the *noun* "Frank."

Examples.—1. I come to bury Cæsar, not to praise him. 2. I hope, madam, you find yourself better this morning. 3. John spoke to Ann: he says she will come when she has found the book he wants. 4. The boy saw the mouse as it ran across the floor. 5. Have you had your breakfast? 6. The children are coming home from school, and they look in at the open door. 7. 10. I come to speak to you of what he wish'd—

Enoch, your husband: I have ever said

You chose the best among us—a strong man;

For where he fixed his heart he set his hand

To do the thing he willed, and bore it through.

Explanation.—The pronoun used by a speaker to denote *himself* is called, in grammar, the pronoun of the *first person*. It is used because it would be very awkward for one to speak his own name every time he had to make a statement about himself.

The pronoun which we use for the name of the person we are addressing is called the pronoun of the *second person*. It is used because it would be very tedious to call persons by their proper name every time we address them. Besides, it often happens that we do not know the name of the person to whom we are speaking.

Three pronouns—*he*, *she*, and *it*—are used instead of nouns which we have already used : by so doing we avoid the unpleasant effect of repeating the same word. These are called pronouns of the *third person*.

These pronouns, since they have special forms to denote the speaker, the person spoken to, and the person or thing spoken of, are called *personal pronouns*.

DEFINITION.—A personal pronoun is one that shows by its form whether it is of the first, second, or third person.

NOTE.—The principal pronouns are :

I.....denoting the speaker.

We.....denoting the speaker along with others.

You.....denoting one or more persons spoken to.

He }
She } ...denoting the person or thing spoken of.
It }

They.....denoting the persons or things spoken of.

The personal pronoun “I” should always be written as a capital letter.

XXXIX.—THE PRONOUN: Relative.

Select from the following examples all those pronouns that relate to a word (noun or pronoun) going before.

MODEL: "The man who sold me the horse that was blind will receive the reward which he merits."

The pronoun "who" relates to the noun "man;" the pronoun "that" relates to the noun "horse;" the pronoun "which" relates to the noun "reward."

Examples.—1. This is the lady who called on you. 2. I have lost the book which I bought. 3. London, which is situated on the Thames, is the capital of Great Britain. 4. I have seen the largest lion that was ever brought to this country. 5. I know what you wish. 6. Are those the dogs which your father had with him? 7. Those who love mercy shall receive mercy. 8. Solomon was the wisest man that ever lived.

15. High on a throne of royal state, which far
Outshone the wealth of Ormus or of Ind,
Satan exalted sat.

Explanation.—Some pronouns not only stand for nouns, but also connect statements. Thus, in the sentence "We love people who love us," the pronoun "who" stands for the noun "people," and at the same time connects the statements "we love people" and "love us."

Since these pronouns carry our mind back to a noun going before, they are called *relative* pronouns; and the noun to which they refer is called the *antecedent*. (*Antecedent* means *going before*.)

DEFINITION I.—A relative pronoun is one that refers to a preceding noun or pronoun, and connects two statements in a sentence.

DEFINITION II.—The antecedent of a relative is the noun or pronoun represented by the relative.

NOTE.—The relative pronouns are: *who, which, what, that*.

XL.—THE PRONOUN: Interrogative.

Select from the following examples the pronouns which are used in asking questions :

MODEL : “ Who did it ? ” “ Which did you see ? ” “ What shall I say ? ”

The words “ who,” “ which,” and “ what ” are used in asking questions.

Examples.—1. Who comes here? 2. Who killed the deer? 3. Which of you did that? 4. What is the meaning of the word *interrogative*? 5. To whom did you offer the present? 6. What's this? 7. Which of the two do you mean? 8. Who comes here? 9. What have you got to say?

DEFINITION.—An interrogative pronoun is a pronoun used in asking a question. They are WHO, WHICH, and WHAT.

XLI.—REVIEW OF PRONOUNS.

There are three subdivisions of pronouns :

I. PERSONAL. II. RELATIVE. III. INTERROGATIVE.

I. A **personal** pronoun is one that shows by its form whether it is of the first, second, or third person.

QUALIFYING.	LIMITING.	ARTICLES

SILK.

We get silk from a caterpillar called the silk-worm. This little creature is green in colour, and feeds on the leaves of the mulberry-tree. It is hatched from an egg about the size of a mustard-seed, and changes its skin four times before it reaches its full size. When full grown it leaves off eating, and covers itself over with a pretty silken case, inside of which the little spinner goes to sleep for some time. When its sleep is over, it makes a hole in its case, and comes out in the shape of a small butterfly, which lays a number of eggs and then dies. It is from the case or ball spun by the silk-worm that all our silk is made. The balls, or cocoons, as they are called, are thrown into warm water, to loosen the gum with which the silk-worm glues the threads together. Then four or five of the threads are fastened to a reel and wound. In this state it is called *raw silk*; and it is next sent to the silk-mill, to be prepared for the weaver. The best silk comes from China, where silk-worms were reared and silk was woven into cloth hundreds of years ago.

DEFINITION I.—A transitive verb is one that denotes an action terminating on some object.

Transitive means *passing over*, for the action denoted by the verb is thought of as passing over to the object.

The **object** of a transitive verb is either a noun (or pronoun) or some word or words having the use of a noun.

DEFINITION II.—An intransitive verb is one that denotes (1) a state or condition, or (2) an action not terminating on an object.

Intransitive means *not passing over* to an object, for the action ends with the person (or thing) spoken of as doing it.

NOTES.

I. The same verb may be either transitive or intransitive, according to its use. Thus—

1. Farmers *mow* (intrans.). Farmers *mow grass* (trans.).
2. Ice *melts* (intrans.). Heat *melts ice* (trans.).
3. Fire *burns* (intrans.). Fire *burns wood* (trans.).

II. Most intransitive verbs require no words to complete their sense ; but a few intransitive verbs take a *complement*, or completing part (see page 50). Such verbs are sometimes called *neuter*, *copula*, or *apposition* verbs. They are, however, simply *intransitive verbs of incomplete predication*.

Exercise 30.

a.

Rule slates or paper as below, and write the verbs.

invented	verb trans.

5. Watt constructed the first steam-engine.
6. Milton wrote *Paradise Lost*.
7. The patriot's heart bled.
8. Is he coming home ?
9. Speak, marble lips !

10. God moves in a mysterious way,
 His wonders to perform :
 He plants his footsteps in the sea,
 And rides upon the storm.

b.

Write twelve sentences with verbs which require an object, and twelve with verbs which do not require an object.

XLVII.—THE ADVERB : Simple and Conjunctive.

Select from the following examples the adverbs that simply *modify verbs* and distinguish them from those that *connect statements* in a sentence.

MODEL : " You live here." " I know where you live."

" Here " is an adverb, and merely modifies the verb " live." " Where " is an adverb, and connects the two statements " I know " and " you live."

Examples.—1. You live here. 2. I know where you live. 3. James studies diligently. 4. I have heard how he studies. 5. Slowly, sadly we laid him down. 6. The wind blew terribly. 7. I will go when I am invited. 8. We must study while we are young. 9. A very pretty bird daintily picked up the crumbs. 10. Do you know why it is cold in northern countries? 11. Go where glory waits thee. 12. Go yonder.

Explanation.—Some adverbs serve only to modify the words with which they are joined. These are called *simple* adverbs.

A few adverbs are used to connect statements in a sentence. These are called *conjunctive* (that is, *con-joining*) adverbs.

DEFINITION I.—A simple adverb is one that merely modifies the word with which it is used.

DEFINITION II.—A conjunctive (or relative) adverb is one that not only modifies the word with which it is used, but connects two statements in a sentence.

NOTES.

I. The principal conjunctive adverbs are : **when, where, whence, why, how.**

II. When the conjunctive adverbs are used to introduce a question, they are called *interrogative* adverbs.

III. The words *yes* and *no* are generally classed with adverbs ; but they do not modify any word. They give answers, or *responses*, to questions ; and hence are sometimes called *responsives*.

Exercise 31.

a.

Rule slates or paper as below, and classify the *adverbs* in this exercise.

SIMPLE.	CONJUNCTIVE.
cheerfully.	when.

1. I will cheerfully accompany you when you are ready.
2. Thomas rose early in the morning, and soon finished his work.
3. He would not tell me where he had put the letter.
4. Will you show me how to perform this example ?
5. Does she write neatly ? No ; quite clumsily.
6. Did you call her once or twice ?
7. Nero was exceedingly cruel.
8. He refused to tell his father why he ran away.
9. That boy goes where he pleases and when he pleases.
10. When the dry season arrives, the reptiles bury themselves in the mud, where they remain till the tropical rains fall again.

b.

Use a corresponding *adverb* for each *adjective*, making such changes in words as are necessary : thus—

1. He is a <i>slow</i> runner.	He runs <i>slowly</i> .
2. The child's sleep was <i>soft</i> .	The child slept <i>softly</i> .
1. He is a <i>swift</i> writer.	He writes
2. Her singing was <i>sweet</i> .	She sang
3. Their failure was <i>complete</i> .	They failed
4. Your labours were <i>successful</i> .	You laboured
5. John had a <i>heavy</i> fall.	John fell
6. My suspicions were <i>correct</i> .	I suspected
7. We took a <i>sly</i> peep.	We peeped
8. I gave him a <i>steady</i> look.	I looked at him.
9. The <i>whole</i> blame was his.	He was to blame.
10. He showed <i>true</i> sorrow.	He was sorry.

XLVIII.—THE CONJUNCTION: Co-ordinate and Subordinate.

Select the sentences the parts of which are independent—that is, those containing *and*, *or*, *but*, *therefore*—and distinguish them from the sentences containing a dependent statement—that is, a statement introduced by *if*, *though*, *unless*, *that*.

Examples.—1. I will go and you will come. 2. I will go if you will come. 3. I will go, if you will remain. 4. Fools build houses, and wise men live in them. 5. You will not become learned unless you study. 6. Stay a while, that we may enjoy ourselves. 7. Napoleon conquered nearly all of Europe, but died a prisoner at St. Helena. 8. We cannot solve the riddle unless we have the key. 9. James or John is to blame. 10. Though He was rich, yet for our sakes He became poor.

Explanation.—The sentence “I will go and you will come” consists of two statements—statements of separate independent facts.

The sentence “I will go, if you will come,” consists of two statements also; but the one is made dependent on the other: I will go, *provided* you come (meaning, if you do not come, I will not go).

A conjunction which connects two independent parts of a sentence is called a *co-ordinate* conjunction—that is, a conjunction joining two parts of the same *order*, or rank. A conjunction which joins a dependent part of a sentence to the principal part is called a *subordinate* conjunction—that is, a conjunction joining a part of a *lower* rank or order to another part.

DEFINITION I.—A co-ordinate conjunction is one that connects words, phrases, or propositions having the same rank.

DEFINITION II.—A subordinate conjunction is one that connects a dependent with a principal proposition.

NOTE.—The principal conjunctions are—

CO-ORDINATE.
and but
either—or
neither—nor
therefore hence

SUBORDINATE.
if lest
though because
unless for
that since

Exercise 32.

Supply conjunctions, and tell whether *co-ordinate* or *subordinate*.

1. The clouds soon passed away, sunshine succeeded.
2. The wicked may prosper for a time, they will receive retribution in the end.
3. Contentment is better riches.
4. He was gentle in manner, resolute in action.
5. We shall improve we study.
6. Life is so uncertain we should always be prepared for death.
7. I told you he would fail.
8. you say so, I cannot believe it.
9. You will succeed you persevere.
10. We study we wish to learn.
11. I shall not tell you, you promise to keep the secret.
12. I think Henry is older Paul, he is not so tall.

REVIEW EXERCISES.

Name the *class* and *subdivision* of each word in the following exercise :

a.

The spider is a cunning fellow. He makes his living by his arts and stratagems. He lives by snares and plots ; and yet he is an interesting little creature. He exhibits wonderful skill and ingenuity in weaving his nest, and possesses extraordinary patience and perseverance. The thread of the spider is a soft substance, which is contained in a little bag in the body of the insect.

b.

Little Ann had a famous dog. His name was Grip. One day Ann went out to visit a poor woman, and took Grip with her. Grip had not gone far until he saw a cat. He immediately gave chase ; but the cat ran up a tree, and was safe. Grip stood at

the bottom, and barked with all his might ; but the cat never heeded him.

c.

I saw a little family of tiny squirrels at play, in the spring, on the top of a hollow log, and really I think they were, without exception, the liveliest, most graceful creatures I ever looked on. The flying squirrel is a native of our woods, and exceeds in beauty, to my mind, any of the tribe. Its colour is the softest, most delicate tint of grey ; the fur thick and short, and as silken as velvet ; the eyes, like all the squirrel kind, are large, full, and soft ; the whiskers, and long hair about the nose, black ; the membrane that assists this little animal in its flight is white, and delicately soft in texture, like the fur of the chinchilla ; it forms a ridge of fur between the fore and hind legs ; the tail is like an elegant broad grey feather. I was agreeably surprised by the appearance of this exquisite little creature, the pictures I had seen giving it a most inelegant and *bat-like* look, almost disgusting. The young ones are easily tamed, and are very playful and affectionate when under confinement.

d.

Then came a burst of thunder sound—
 The boy—O, where was he ?
 Ask of the winds that far around
 With fragments strewed the sea—
 With mast, and helm, and pennon fair,
 That well had borne their part ;
 But the noblest thing that perished there,
 Was that young, faithful heart.

[Girls may add a recipe for making any kind of bread or cake.]

d.—ABSTRACT FROM MEMORY.

TURNING THE GRINDSTONE.

When I was a little boy, I remember, one cold winter's morning, I was accosted by a smiling man with an axe on his shoulder.

"My pretty boy," said he, "has your father a grindstone?" "Yes, sir," said I. "You are a fine little fellow," said he; "will you let me grind my axe on it?" Pleased with the compliment of "fine little fellow," "O yes, sir," I answered, "it is down in the shop." "And will you, my little man," said he, patting me on the head, "get me a little hot water?" How could I refuse? I ran, and soon brought a kettleful. "How old are you? and what's your name?" continued he; "I am sure you are one of the finest lads that ever I have seen; will you just turn a few minutes for me?"

Tickled with the flattery, like a little fool, I went to work, and bitterly did I regret it. It was a new axe, and I toiled and tugged till I was very tired. The school-bell rang, but I could not get away; my hands were blistered, and the axe was not half ground. At length, however, it was sharpened, and the man turned to me with, "Now, you little rascal, you've played truant; scud to the school, or you'll catch it!" It was hard enough to turn a grindstone, but to be called a little rascal was too bad.

e.—LETTER-WRITING.

SECTION IV.

MODIFICATIONS OF THE PARTS OF SPEECH.

XLIX.—MODIFICATIONS DEFINED.

A noun may denote one or more than one of the objects named : as—

ONE.	MORE THAN ONE.
star	stars
lady	ladies
ox	oxen

The distinction between one or more than one is called **number**.

A noun may be the subject of a verb, or the object of a verb, or it may denote that the person or thing named possesses something.

1. Mother [*subj.*] loves baby [*obj.*].
2. Baby [*subj.*] loves mother [*obj.*].
3. The *boy's* kite is torn [*poss.*].

These differences in the form or use of nouns are called **case**.

An adjective may denote a quality in different degrees : thus—

1. John is a *tall* boy.
2. James is *taller* than John.
3. Richard is the *tallest* boy in the class.

The changes to denote different degrees of a quality are called **comparison**.

A verb may denote an action *now going on*, or one *done*, or one *to be done* : as—

We *walk*—we *ride*.
 We *walked*—we *rode*.
 We *shall walk*—we *shall ride*.

The form by which a verb expresses time is called **tense**.

Any grammatical change in a part of speech is called a **modification** of that part of speech : hence—

DEFINITION.—Modifications of the parts of speech are their grammatical changes.*

The preposition, the conjunction, and the interjection have no grammatical changes (modifications).

L.—MODIFICATIONS OF THE NOUN.

The noun has two principal modifications:

* The expression “grammatical form” is deemed by the author a more exact defining term for the “properties” of the parts of speech ; and that term is employed in his advanced grammar. But for elementary purposes the word “modifications” may be preferred as less abstract. Teachers will please observe, however, that “modifications” is used in an enlarged sense, embracing all strictly grammatical changes, whether expressed by inflections, radical change, the use of auxiliaries, or by mere grammatical relation.

I. NUMBER. II. CASE.

NOTE.—The secondary modifications, namely, *gender* and *person*, are explained in the Notes on page 87.

1. NUMBER.

Number is a modification expressing one or more than one of the objects named by the noun.

There are two numbers, the *singular* and the *plural*.

The **singular** number denotes one : as, *star*, *child*.

The **plural** number denotes more than one : as, *stars*, *children*.

RULES FOR FORMING THE PLURAL.

GENERAL RULE.—The plural number of nouns is generally formed by adding **S** to the singular.

EXERCISE.—Write the plural of the following nouns :

bud	eagle	citizen	number
flower	hawk	president	gender
fruit	wren	monarch	case

SPECIAL RULE I.—When the singular ends in **S**, **SH**, **Z**, **X**, or **CH** soft (as in *church*), the plural is formed by adding **ES**, making another syllable : thus—

gas, gas-es	waltz, waltz-es
guess, guess-es	fox, fox-es
dish, dish-es	bench, bench-es

OBS.—Some nouns ending in *o* preceded by a consonant add *es* without increase of syllables : as, *hero*, *heroes* ; *potato*, *potatoes*.

EXERCISE.—Write the plural of the following nouns :

kiss	lash	topaz	thrush
cross	birch	chorus	hoax
match	compass	tax	miss

SPECIAL RULE II.—When the singular ends in **Y** preceded by a consonant, the plural is formed by changing the **Y** into **I** and adding **ES** : thus—

sky, skies ; lady, ladies ; balcony, balconies.

Obs.—But when it is preceded by a vowel the plural is formed by the General Rule.

EXERCISE.—Write the plural of the following nouns :

story	party	beauty	joy
ray	quality	duty	pony
injury	society	century	donkey

SPECIAL RULE III.—Some nouns ending in **F** or **FE** form their plural by changing **F** or **FE** into **V**, and adding **ES** : as—

thief, thieves ; wife, wives.

EXERCISE.—Write the plural of the following nouns :

knife	leaf	self	elf
loaf	shelf	wolf	beef
life	calf	sheaf	half

IRREGULAR PLURALS.

The following nouns form their plural irregularly :

man	men	ox	oxen	foot	feet
woman	women	mouse	mice	tooth	teeth
child	children	louse	lice	goose	geese

[For peculiarities of number, foreign plurals, &c., see Appendix, pages 173–175.]

2. CASE.

Case is a modification denoting the relation of a noun to some other word in the sentence.

There are three cases of nouns : I. THE NOMINATIVE. II. THE POSSESSIVE. III. THE OBJECTIVE.

The **nominative** case is that *form* which a noun has when it is the subject of a verb.

The **possessive** case is that *form* which a noun has in order to denote ownership or possession.

The **objective** case is that *use* which a noun has when it is the *object* of a verb or of a preposition. Its *form* is the same as the nominative case.

RULES FOR THE POSSESSIVE CASE.

1. The possessive singular is formed by adding an apostrophe (') and s to the nominative singular: as, boy, boy's.

2. The possessive plural is generally formed by adding an apostrophe to the nominative plural: as, boys, boys'; but when the nominative plural does not end in s, the possessive plural is formed like the possessive singular: as, children, children's; oxen, oxen's; sheep, sheep's.

EXERCISE.—Write the *possessive*, singular and plural (if any), of the following nouns:

1. child; prince; woman; king; cable; tutor.
2. peril; mercy; father; Henry; aunt; cat.
3. Charles; gardener; brother; poetess; author; painter.
4. sculptor; engineer; sister; Socrates; princess; bridge.
5. house; Peter; righteousness; ox; thief; sheep.

Declension.—A noun is said to be *declined* when we name its three cases in the two numbers; the process of doing so is called *declension*.

DECLENSION OF NOUNS.

BOY.			MAN.		
	SINGULAR.	PLURAL.		SINGULAR.	PLURAL.
<i>Nom.</i>	boy	boys	<i>Nom.</i>	man	men
<i>Poss.</i>	boy's	boys'	<i>Poss.</i>	man's	men's
<i>Obj.</i>	boy	boys	<i>Obj.</i>	man	men

<i>Nom.</i>	lady	ladies	<i>Nom.</i>	sheep	sheep
<i>Poss.</i>	lady's	ladies'	<i>Poss.</i>	sheep's	sheep's
<i>Obj.</i>	lady	ladies	<i>Obj.</i>	sheep	sheep

NOTES ON GENDER AND PERSON IN NOUNS.

I. **Gender.**—When the noun is the name of a male, it is said to

be of the *masculine gender*; when it is the name of a female, it is said to be of the *feminine gender*. Things which have no sex, or which are not spoken of as male or female, are said to be of the *neuter gender*.

Sometimes the distinction of male and female is shown by the form of the noun: as, *lion*, *lioness*.

Sometimes it is shown by prefixing a word denoting sex: as, *he-bear*, *she-bear*.

Sometimes it is shown by the use of quite different words: as, *boy-girl*; *bachelor*, *spinster*.

II. Person.—In some *pronouns* the names *first*, *second*, and *third persons* are used to denote the distinction between the speaker, the person spoken to, and the person or thing spoken of. This distinction is shown in the pronouns called *personal* pronouns: namely—

First person.....I (denoting the speaker).

Second person.....you (denoting the person spoken to).

Third person.... $\left\{ \begin{array}{l} \text{he} \\ \text{she} \\ \text{it} \end{array} \right\}$ (denoting the person or thing spoken of).

We sometimes join a noun with a pronoun of the first person: as—

I Paul have written it.

And sometimes we address a person by a real name instead of a pronoun: as—

Plato, thou reasonest well.

The noun “Paul” is in the *first* person, and the noun “Plato” in the *second* person. With the exception of such examples as these, nouns are always the names of persons or things that we speak of—which may be denoted by *he*, or *she*, or *it*—and hence are in the *third* person. Besides, there is no change of form to mark the *person* of a noun. This distinction is, therefore, of little importance in parsing nouns.

LII.—MODIFICATIONS OF THE PRONOUN.

I. THE PERSONAL PRONOUNS.

The personal pronouns have modifications denoting person, gender, number, and case. They are thus declined :

	SINGULAR.			PLURAL.		
	<i>Nom.</i>	<i>Poss.</i>	<i>Obj.</i>	<i>Nom.</i>	<i>Poss.</i>	<i>Obj.</i>
<i>First person,</i>	I,	my or mine,	me.	We,	our or ours,	us.
<i>Second,</i>	You,	your or yours,	you.	You,	your or yours,	you.
<i>Third,</i>	<i>Mas.</i> He,	his,	him.	They,	their or theirs,	them.
	<i>Fem.</i> She,	her or hers,	her.			
	<i>Neut.</i> It,	its,	it.			
<i>Second pers., solemn style.</i>	Thou, thy or thine, thee.			<i>Nom. pl.</i> Ye.		

NOTES ON THE PERSONAL PRONOUNS.

I. Except in the third personal pronoun singular, which has a form for each gender (*he, she, it*), the gender of the personal pronouns depends on the gender of the nouns for which they stand. Thus, *I, thou, we, you* may be either masculine or feminine according as they take the place of names of males or of females ; and *they* may be masculine, feminine, or neuter according as it takes the place of a masculine, a feminine, or a neuter noun.

II. The personal pronouns of the first and second persons have two possessive forms : *my, mine ; your, yours ; our, ours* ; also the third feminine has *her, hers*. The former of each pair is used when joined with a noun ; the latter is used when the noun is omitted. Thus—

This is	{	my	} house.	But, This house is	{	mine.
		her				hers.
		our				ours.
		your				yours.
		their				theirs

II. THE RELATIVE AND INTERROGATIVE PRONOUNS.

The relative and interrogative pronouns *who* and *which* have modifications denoting case. *That* and *what* are not declined.

	SINGULAR.			PLURAL.		
	<i>Nom.</i>	<i>Poss.</i>	<i>Obj.</i>	<i>Nom.</i>	<i>Poss.</i>	<i>Obj.</i>
<i>m. or f.</i>	Who,	whose,	whom.	Who,	whose,	whom.
<i>m., f., or n.</i>	Which,	whose,	which.	Which,	whose,	which.

Exercise 33.

a.

Tell the *person*, *number*, and *case* of the pronouns.

1. Heaven helps men who help themselves.
2. Promise me that you will send him what he wants.
3. Whatever he asks I will give him.
4. Avoid such companions as do not speak the truth.
5. Who found the money? It was we.
6. We bathed in Great Salt Lake, whose waters floated us like corks.
7. I think I know what you were talking about.
8. This is the dog that worried the cat that caught the rat that ate the malt.
9. Whom did you say she married?
10. What is it worth? What is it good for?

b.

2. Compose a sentence containing the personal pronoun of the third person plural.
3. Compose a sentence containing the personal pronoun of the third person, singular number, feminine gender.
4. Compose a sentence containing the relative *who* in the objective case.
5. Compose a sentence containing the relative *which* in the possessive case.
6. Compose a sentence containing the interrogative pronoun *what* in the nominative case.

LIII.—MODIFICATIONS OF THE ADJECTIVE AND ADVERB.

The adjective may change its form to denote *comparison*. Thus—

1. John is a *tall* boy.
2. James is *taller* than John.
3. Richard is the *tallest* boy in the class.

Explanation.—The expression “a tall boy” means a boy who can be said to be *tall* “for a boy;” that is, without comparison. But when it is said that “James is *taller* than John,” we mean that James has *more* of the quality of *tallness* than John has. And when we say, “Richard is the *tallest* boy in the class,” we mean that, as regards the “boys in the class,” Richard has the quality of *tallness* in the greatest degree.

DEFINITION I.—Comparison is a modification of adjectives (and adverbs) to express degrees of quantity or quality.

DEFINITION II.—The degrees of comparison are called the positive, the comparative, and the superlative degree.

The *positive* degree denotes simple quantity or quality.

The *comparative* denotes a greater degree of the quantity or quality.

The *superlative* degree expresses the greatest degree of the quantity or quality.

RULE FOR COMPARATIVE AND SUPERLATIVE.

The comparative degree is generally formed by adding *er* to the positive: as, *tall*, *taller*; and the superlative degree by adding *est* to the positive: as, *tall*, *tallest*.

But many adjectives of two syllables and all adjectives of more than two are compared by prefixing to the positive *more* for the comparative and *most* for the superlative: as, *splendid*, *more splendid*, *most splendid*; *beautiful*, *more beautiful*, *most beautiful*.

NOTE.—The addition of *er* and *est* sometimes causes the positive to undergo certain changes, according to the rules for spelling derivative words: thus—

blue + er = bluer* (not *blueer*)
 red + er = redder* (not *reder*)
 happy + er = happier* (not *happyer*)

Irregular Adjectives.—A few adjectives form their comparatives and superlatives irregularly. Thus—

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
good	better	best
well	better	best
bad	worse	worst
evil		
ill		
little	less	least
many	more	most
much		
far	farther <i>or</i> further	farthest <i>or</i> furthest
near	nearer	nearest <i>or</i> next
late	later <i>or</i> latter	latest <i>or</i> last
old	older <i>or</i> elder	oldest <i>or</i> eldest
hind	hinder	hindmost
[up: <i>adv.</i>]	upper	upmost <i>or</i> uppermost
[out: <i>adv.</i>]	outer	utmost, uttermost, <i>or</i> outmost

The Adverb.—The adverb, like the adjective, often undergoes a change of form to express *comparison*.

Adverbs are compared in the same way as adjectives: thus—

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
soon	sooner	soonest
sweetly	more sweetly	most sweetly

Exercise 34.

LIV.—MODIFICATIONS OF THE VERB.

Number of Modifications.—The verb has modifications of five kinds: namely, I. PERSON. II. NUMBER. III. TENSE. IV. MOOD. V. VOICE.

1. PERSON AND NUMBER.

DEFINITION.—Person and number in verbs are modifications expressing the agreement of a verb with its subject.

Person.—Verbs are said to have three persons, according as they are connected with one of the three personal pronouns. Thus—

1. I call—(verb in the *first* person).
2. You call—(verb in the *second* person).
3. He [or any singular noun] calls—(verb in the *third* person).

Number.—Verbs are said to have two numbers according as they are connected with a singular or a plural subject. Thus—

1. The boy calls—(verb in the *singular* number).
2. The boys call—(verb in the *plural* number).

NOTE.—There are very few actual forms to mark the person and number of a verb, and usually these modifications can be told only by referring to the subject. “A verb agrees with its subject in person and number.”—Syntax, Rule II.

Exercise 35.

a.

Tell the person and number of each verb by referring to the person and number of the subject.

1. I met a little cottage girl.

 In life's morning march, when my bosom was young ;

 And knew the sweet strain that the corn-reaper sung.

b.

| 3. I the birds. | 6. You to succeed. |

c.

Change the following verbs into the singular form, using a singular subject instead of each plural subject :

Flowers bloom, grow, fade, flourish, thrive.
 Animals eat, drink, sleep, live, die.

2. THE TENSES.

DEFINITION.—Tenses are modifications of the verb to denote the time of an action or event.

NOTE.—The tenses denote, in addition to the time of an action or event, the degree of its completeness.

There are six tenses : namely—

Present
Past
Future

Present Perfect
Past Perfect
Future Perfect

3. THE MOODS.

DEFINITION.—Moods (or modes) are modifications of the verb to denote the manner of asserting action or being.

NOTE.—"Mood (or mode) is a grammatical form denoting the style or manner of predication."—SWINTON'S *English Grammar*.

There are four moods : namely—

Indicative
Potential

Subjunctive
Imperative

The **indicative** mood is used in the statement of a fact, or of a matter taken as a fact.

The **potential** mood is used in the statement of something that may, can, might, could, would, or should be.

The **subjunctive** mood is used in the statement of something merely *thought of*.

The **imperative** mood is used in the statement of a command or request.

4. THE VERBALS.

DEFINITION.—The verbals are verb-forms, partaking of the nature of the verb, and having in addition the use of some other part of speech.

The verbals are of two kinds : I. INFINITIVES. II. PARTICIPLES.

The **infinitive** is a verbal noun. It merely *names* the action or state which the verb *asserts*. Thus—

To read good books is improving.

“To read” is an infinitive. It partakes of the nature of the verb, because it takes an object, “books ;” and it has in addition the use of a noun, because it is the subject of the verb “is.” Hence “to read” is a *verbal noun*.

The **root** (or root infinitive) of a verb is a verb in its simplest form, and is the same as the infinitive without the preposition *to*. Thus *read* is the root of the verb *to read*.

The Gerund.—Besides the regular form of the infinitive, the verbal in *ing* is sometimes equivalent to an infinitive : thus—

Reading good books (= to read good books) is profitable.

This form is called the *gerund*. The gerund is a verbal noun.

The **participle** is a verbal adjective. It shares or *participates* in the nature both of the verb and of the adjective. Thus—

The boy, seeing the bear, ran away.

“Seeing” is a participle. It partakes of the nature of the verb, because it takes an object, “bear,” and of the adjective, because it is joined with a noun, “boy,” to modify it.

There are two participles formed by suffixes—the *present* participle and the *past* participle.

RULE.—The present participle of all verbs is formed by adding **ING** to the root ; as—

write, writing ; hop, hopping.

NOTE.—In adding *ing* the rules for spelling derivative words must be observed.

RULE.—The past participle of most verbs is formed by adding **ED** to the root ; but some verbs form their past participles in other ways : as—

write, written ; tell, told.

NOTE.—Verbs that do not form their past participle by adding *ed* belong to the class of irregular verbs. (See Definition, page 99.)

5. VOICE.

DEFINITION.—Voice is a modification of the transitive verb, expressing whether the subject names the actor or the recipient of the action.

There are two voices : namely, the *active* voice and the *passive* voice.

A verb in the **active** voice represents the subject as acting upon an object : as—

Watt invented the steam-engine.

A verb in the **passive** voice represents the subject as receiving an action : as—

The steam-engine was invented by Watt.

RULE.—The passive voice is formed by uniting with the past participle of any transitive verb the various parts of the verb **TO BE**.

6. CONJUGATION OF VERBS.

The **conjugation** of a verb is the systematic arrangement of its various forms.

There are two conjugations: I. **THE REGULAR.** II. **THE IRREGULAR.** These two conjugations are distinguished by the mode of forming the past tense (indicative) and the past participle.

A **regular** verb is one whose past tense and past participle are formed by adding **ed** to the root: as, (root) *love*; (past tense) *loved*; (past participle) *loved*.

OBS.—In suffixing *ed* care must be taken to observe the rules for spelling derivative words.

An **irregular** verb is one whose past tense or past participle, or both, are not formed by adding **ed** to the root: as, (root) *take*; (past tense) *took*; (past participle) *taken*.

The principal parts of a verb are: I. **THE PRESENT INDICATIVE.** II. **THE PAST INDICATIVE.** III. **THE PAST PARTICIPLE.**

An **auxiliary** verb is one used to assist in conjugating other verbs. The principal auxiliaries are, *do, be, have, shall, may, can, must*, with their variations.

c.—ABSTRACT FROM MEMORY.

FIVE PEAS IN ONE POD.—[Adapted from Hans Andersen.]

Once there were five peas growing in one pod. The peas were green, the pod was green, the vine was green, the leaves were green, and they thought all the world was green. The warm sun shone on the vine—the summer rain watered it. The shell grew larger, and the peas grew bigger and bigger.

“Are we to lie here cooped up for ever?” asked one.

“I am tired of it,” said another.

“I fear we shall become hard,” said a third.

“I want to see what there is outside,” said a fourth; while the fifth, a very little pea, cried because he could not get out.

At length the vine turned yellow, the pod turned yellow, and the peas turned yellow.

“All the world is turning yellow,” said the peas, with one voice.

Then there came an earthquake, the pod burst open with a crack, and all the five peas rolled out into the yellow sunshine. A little boy clutched them, and said they were fine peas for his pea-shooter. He put the biggest one into his gun, and shot it out.

“Catch me if you can,” said the big pea.

“I shall fly straight into the sun,” said the next one.

“I shall travel farthest,” said the third pea.

“Let me alone,” said the fourth.

“What is to be will be,” said the little pea, as he shot up and

lodged in an empty flower-pot in the window of a room where lay a poor sick girl.

Pretty soon the little pea sprouted, and began to grow up into a beautiful vine.

"Dear mother, I think I shall get well," said the little girl one day ; "for my pea is growing famously."

"God grant it," said the mother ; and she took a stick and tied a string to it, so that the green vine might have something to cling to.

After many days there stood a beautiful pink pea-blossom smiling in the warm sunshine. The little girl kissed it, and said, "Now I am sure I am going to get well."

SECTION V.

SYNTAX.

Syntax is that division of grammar which treats of the relations of words in sentences.

It is divided into two parts—parsing and the rules of construction.

Parsing consists in stating the class, subdivision, and modifications of the words in a sentence.

The rules of construction are statements of the general principles governing the relation of words in sentences.

I. PARSING.

In parsing the different parts of speech the method indicated in the following tables may be followed :

Noun	{ SUBDIVISION— <i>proper, common, or abstract.</i> NUMBER— <i>singular or plural.</i> (Number in proper nouns may be omitted.) CASE— <i>nominative, possessive, or objective</i> (as denoted by form or use).
Pronoun ...	{ SUBDIVISION— <i>personal, relative, or interrogative.</i> PERSON—(in personal pronouns ; in relative pronouns of the 1st or 2d person only). NUMBER— <i>singular or plural.</i> GENDER—(in personal pronouns of the 3d person singular only). CASE— <i>nominative, possessive, or objective.</i>
Adjective ...	{ SUBDIVISION— <i>limiting</i> (pronominal) or <i>qualifying.</i> COMPARISON— <i>positive, comparative, or superlative.</i> OFFICE— <i>attributive or complementary.</i>

Verb.....	{	CONJUGATION— <i>regular or irregular.</i>
		SUBDIVISION— <i>transitive or intransitive.</i>
		VOICE— <i>active or passive.</i>
		MOOD— <i>indicative, potential, etc.</i>
		TENSE— <i>present, past, etc.</i>
		PERSON— <i>first, second, or third.</i>
		NUMBER— <i>singular or plural.</i>
Adverb.....	{	SUBDIVISION— <i>simple or conjunctive.</i>
		COMPARISON—(<i>if comparative or superlative</i>).
Prepositions....words connected.		
Conjunctions....words or propositions connected.		

II. RULES OF CONSTRUCTION.

Rule I.—The subject of a verb is in the nominative case.

Rule II.—A verb agrees with its subject in person and number.

Rule III.—Adjectives and participles modify nouns or pronouns.

Rule IV.—A noun modifying another noun signifying a different thing is in the possessive case.

Rule V.—A noun or pronoun used to explain another noun or pronoun is put by apposition in the same case.

Rule VI.—The object of a transitive verb is in the objective case.

Rule VII.—A noun or pronoun used as the complement of an intransitive or a passive verb is in the nominative case.

Rule VIII.—An adverb modifies a verb, an adjective, or another adverb.

Rule IX.—A pronoun agrees in person, gender, and number with its antecedent or the word to which it represents.

Rule X.—1. A preposition joins a noun or pronoun to some other word.

2. A noun or pronoun depending on a preposition is in the objective case.

Rule XI.—Conjunctions connect words, phrases, or propositions.

Rule XII.—1. A noun or pronoun whose case depends on no other word is put in the nominative case.

2. The interjection has no grammatical relation to the other parts of the sentence.

THE SUBJECT.

RULE I.—The subject of a verb is in the nominative case: as—

1. *Water* consists of two gases.
2. *He* is the man *who I* think wrote the letter.

MODEL FOR PARSING.

- water**....is a common noun, of the singular number and nominative case, subject of the verb “consists,” according to Rule I.

- I**.....is a personal pronoun, of the first person, singular number, nominative case, subject of the verb “think,” according to Rule I.

Exercise 37.

In the following sentences parse the subjects according to the model :

1. Books are not dead things.
2. The teacher taught the pupils to sing.

3. The crows which are feeding in the field are easily frightened.
4. I heard a wonderful story when I was a little girl.
5. We will know our lesson better to-morrow.
6. He lives in the old cottage at the foot of the hill.
7. And the mother gave, in tears and pain,
 The flowers she most did love ;
 She knew she should find them all again
 In the fields of light above.

CAUTION.—Never use a pronoun in the objective case as the subject of a verb: thus—

Betsey and *me* were out.

This is incorrect, because the pronoun “me” in the objective case is made the subject of the verb “were.” It should be, “Betsey and I were out.”

Exercise 38.

Correct by the caution the following examples :

1. Suppose you and me go a-gunning.
2. Ida is the girl whom we supposed would read the poem.
3. Who will go after a pail of water? Her and me [will go].
4. Who did the mischief? Them [did].
5. Them are the books which we wanted.
6. You learn faster than me [learn].

AGREEMENT OF THE VERB.

RULE II.—A verb agrees with its subject in number and in person : as—

1. I *am* that merry wanderer.
2. A bee among the flowers of spring *is* one of the most cheerful objects that can be seen.

MODEL FOR PARSING.

am.....is an irregular intransitive verb (be), of the indicative mood, present tense, first person singular, and agrees with its subject “I,” according to Rule II.

is.....is an irregular intransitive verb, of the indicative mood,

present tense, third person singular, and agrees with its subject "bee," according to Rule II.

can be seen. is an irregular transitive verb (see), of the passive voice, potential mood, present tense, third person plural, and agrees with its subject "that."

2. We wandered across the meadows.
3. The goats were feeding on the mountain-side.
4. Still waters run deep.
5. Where have you been ?
6. Men may come, and men may go.
7. "For oh !" say the children, "we are weary,
And we cannot run or leap."

CAUTION.--Words or phrases qualifying the subject must not affect the number of the verb : thus--

The sound of many voices *reach* my ear.

Incorrect : because the verb "reach" is plural, while its subject "sound" is singular. It should be "The sound of many voices *reaches* my ear."

Special Rules under Rule II.

SPECIAL RULE I.--Two or more subjects in the singular connected by **AND**, and conveying plurality of idea, require a verb in the plural : as--

1. Gold and iron *are* metals.
2. Mary and Ida *seem* happy.

CAUTION.--When two singular nouns convey the idea of one person or thing, or when they are preceded by **EACH**, **EVERY**, or **NO** (and are thus taken separately), the verb must be in the singular : as--

The general and governor who captured Detroit *were* killed at Queenston Heights.

Incorrect : because the nouns “general” and “governor” denote one person (Brock), and hence should take a verb in the singular. But “were killed” is plural. It should be “was killed.”

SPECIAL RULE II.—Two or more subjects in the singular connected by **OR** or **NOR** require a verb in the singular : as—

1. Either the man or his wife *has* stolen my watch—(not “*have* stolen my watch”).
2. Neither the day nor the hour *has* been appointed—(not “*have* been appointed”).

SPECIAL RULE III.—Collective nouns require a verb in the singular when the sense is singular, and in the plural when the sense is plural : as—

The regiment *was* composed of many men.

We think of the *regiment* (though composed of many men) as forming one body. The sense is singular, and hence the verb “was composed” is singular also.

The people *were* greatly displeased.

We do not think of “people” as denoting one body : it has the sense of many persons, *each* of whom “*was displeased.*” Hence the verb is plural.

2. The use of the pronoun *them* for the adjective *those*. Say "*those* carriages," "*those* apples"—not "*them* carriages," "*them* apples."

Special Rules under Rule III.

1. THE ARTICLES.

SPECIAL RULE I.—When two or more nouns or adjectives refer to the same

* Noun used as an adjective.

thing, the article is prefixed to the first only; but if they refer to different things, the article should be repeated with each: thus—

2. The governor and *the* commander-in-chief have arrived (that is, two persons).
3. He lives in *a* long and narrow street (one street).

1. Gold is *heavier* than iron.
2. Mercury is the *heaviest* of metals.

3. PREDICATE ADJECTIVE.

SPECIAL RULE III.—A predicate adjective relates to the subject of the verb; as—

1. Iron is *hard*.
2. The fruit seems *ripe*.

CAUTION.—An adverb should not be used in place of a predicate adjective; thus—

The rose smells *sweetly*; The velvet feels *smoothly*.

The adverbs “sweetly” and “smoothly” are here used incorrectly for the adjectives *sweet* and *smooth*.

The rose does not really “smell” or the velvet “feel;” what is meant is that the rose *is sweet* to the smell or scent, and that the velvet *is smooth* to the touch. In each case it is the subject, not the verb, that is to be modified, and hence an adjective, not an adverb, is required.

NOTE.—The following verbs, each containing the force of the verb *to be*, require to be followed by a predicate adjective when the subject is to be modified.

- | | | |
|-----------|-----------|------------|
| 1. smell. | 3. look. | 5. become. |

9. Did the War of 1812 happen in Brock's‡ or in Prevost's administration?
10. Let all the ends thou aim'st at be thy country's, thy God's, and truth's.

CAUTION.—Never omit the sign of possessive in writing the possessive case of a noun, nor employ it in writing that of a pronoun: as—

Write *boy's, boys', child's, children's*—not *boys, child's, childrens*.
Write *hers, its, ours, yours, theirs*—not *her's, it's, our's, your's, their's*.

Special Rule under Rule IV.

When two or more nouns in the possessive case are connected and denote joint owners of the same thing, the sign of possessive is suffixed to the last noun only: as—

“Smith and Thomson's store.”

 Special Rules under Rule VI.

SPECIAL RULE I.—The indirect object of a transitive verb may be in the objective case without a preposition : as—

Give *me* a book.

The indirect object shows that *to* or *for* which anything is or is done.

SPECIAL RULE II.—The infinitives or participles of transitive verbs may govern objects in the objective case : as—

CAUTION II.—Never use an adjective where an adverb is required : thus—

1. The army marched *rapidly*—(not *rapid*).
 2. The horse trots *well*—(not *good*).
 3. The bird sings *beautifully*—(not *beautiful*).
-

Special Rules under Rule VIII.

SPECIAL RULE I.—Adverbs should be so placed in a sentence as to qualify the word intended : thus—

1. He came to see me *only* once.
2. He *only* came to see me once.

These two sentences have different meanings according as the adverb "only" is placed so as to qualify *once* or *came*. The first means, "He came to see me *only* once," *not oftener*. The second means, "He *only* came to see me once"—*he did nothing else*.

SPECIAL RULE II.—A noun denoting direction, time, distance, value, etc., is in the objective case without a preposition : thus—

1. The scholars have gone *home*—(modifying "have gone").

2. That girl is fifteen *years* old—(modifying “old”).

2. The lady who went to Europe has returned.

MODEL FOR PARSING.

she...is a personal pronoun, of the third person, singular number and feminine gender, to agree with the noun “lady,” which it represents, according to Rule IX.

7. This is the same book that I saw yesterday.
8. The sea, which washed the shore, was covered with wrecks.
9. I that denied thee gold will give my heart.

CAUTION.—Do not use a personal pronoun as subject of a verb when the verb has already a noun for its subject: thus—

Say “Richard went to school”—not “Richard *he* went to school.”

NOTE.—In poetry both nouns and pronouns are often used : as, “The deck it was their field of fame.” But in prose we should say, “The deck was their field of fame.”

Special Rules under Rule IX.

SPECIAL RULE I.—When a pronoun is used to represent two or more singular nouns, it must be singular or plural, according as the verb agreeing with the nouns is singular or plural: thus—

1. Gladstone and Disraeli are distinguished for *their* oratory.
2. The celebrated painter and sculptor died before *he* was fifty years of age.
3. Every act and every thought has *its* effect on our character.
4. Every boy and girl must take *his* or *her* own seat.†
5. Will Jennie or Hattie sing us *her* favourite song?

* In sentences of this nature, the teacher has simply to ask what pronoun could be substituted for “my sister and I” to enable the pupil to observe the usage. No special rule is required.

† In sentences like this, the selection of pronouns is often difficult. We must not use the plural pronoun *their*, since the adjective “every” implies that each one is taken separately, and “his” must be represented by a singular pronoun. To “his or her own seat,” though correct, is very formal; and perhaps the best way is to change the form of expression and say: “All boys and girls must take their own seats.”

SPECIAL RULE II.—A collective noun is represented by a pronoun in the singular number when the meaning of the noun is singular, but by a plural pronoun when the meaning is plural: thus—

1. Parliament will hold *its* session till March.
2. The people were divided in *their* opinion.

SPECIAL RULE III.—The relative pronoun **THAT** should be used in preference to **WHO** or **WHICH** in the following cases :

1. After the interrogative pronoun *who* : as, “Who *that* heard it will believe it?”
2. After an antecedent preceded by the adjectives *some, same, any*: as, “Some people *that* were there said so;” “This is the same man *that* you saw;” “Do you know any person *that* thinks so?”
3. After an adjective in the superlative degree: as, “These apples are the best *that* can be found.”
4. After two antecedents, one requiring *who* and the other *which* : as, “The boy and the dog *that* you saw are gone.”
5. Whenever we wish to restrict the meaning of the antecedent

NOTE.—When *who* or *which* means “and he,” “and it,” etc., it introduces an additional or explanatory statement; *that* introduces a clause without which the antecedent is incomplete, and hence is *restrictive*. Thus—

I heard the news from my friend, *who* [and he] heard it from the passengers *that* [restrictive] arrived last night.

SPECIAL RULE IV.—In the position of singular pronouns of different persons, the second (**YOU**) precedes the others (**HE, SHE, IT, I**); and the third (**HE, SHE, IT**) precedes the first (**I**): as—

“*You* and *he* will go;” “*He* and *I* will go.”

NOTE.—A noun has the same place as a third personal pronoun: as, “He says he saw either my *cousin* or *me*.”

With the plural pronouns, *we* has the first place, *you* the second, and *they* the third: as, "*We* and *they* start to-morrow."

I had a little daughter,
And she was given to me
To lead me gently backward
To the heavenly Father's knee.

MODEL FOR PARSING.

me..... is a personal pronoun, of the first person, singular number, and objective case, depending on the preposition "to," according to Rule X.

knee.....is a common noun, of the singular number and objective case, depending on the preposition “to,” according to Rule X.

CAUTION.—When a pronoun is remote from the preposition on which it depends, care should be taken that it has the proper objective form: thus—

Who does this slate belong to?

This is incorrect: the pronoun “who” in the nominative depends on the preposition “to;” but according to Rule X. a noun or a pronoun depending on a preposition should be in the objective case. Hence it should be “*Whom* does this slate belong to?” or “*To whom* does this slate belong?”

Exercise 53.

Correct the violations of Rule X.

1. Between you and I all that glitters is not gold.
 2. Come along with William and I.

5. The trees have lost their foliage, because autumn has come.
6. Seasons return, but not to me returns
Day, or the sweet approach of even or morn.

NOMINATIVE INDEPENDENT AND ABSOLUTE —THE INTERJECTION.

Rule XII.—I. A noun or pronoun whose case depends on no other word is put in the nominative case.

II. The interjection has no grammatical relation to the other parts of the sentence.

I. A noun or pronoun is used *independently* when it has no grammatical relation to the rest of the sentence. There are two principal uses of this construction :

1. In naming a person or thing addressed : as—

Plato, thou reasonest well.

O thou, who art with glory and majesty crowned !

2. When a noun or pronoun is joined with a participle to form a phrase not grammatically connected with the rest of the sentence : as—

The *storm* having ceased [phrase independent], we departed.

MODEL FOR PARSING.

Plato...is a proper noun, in the nominative case independent, according to Rule XII.

storm...is a common noun, of the singular number and nominative case, nominative absolute (with the participle "having ceased"), according to Rule XII.

O.....is an interjection, and has no grammatical relation to the other parts of the sentence, according to Rule XII.

II. A good practical rule with respect to the use of the subjunctive is that it is to be employed *whenever a potential or a future auxiliary is implied*: thus—

1. Though he [*may*] *slay* me, I will trust in him.
2. Go thy way lest a worse fate [*should*] *befall* thee.

LX.—ANALYSIS OF THE COMPOUND SENTENCE.

I. NATURE OF THE COMPOUND SENTENCE.

I. The compound sentence consists of two or more independent propositions.

II. Compound sentences may consist of two or more simple sentences, or of two or more complex sentences, or of a simple sentence combined with a complex sentence: thus—

1. The fields are fragrant and the woods are green.
2. I speak not to disprove what Brutus spoke,
But here I am to speak what I do know.
3. The evil that men do lives after them ; [but]
The good is oft interred with their bones.

III. The leading statements of a compound sentence are generally connected by a co-ordinate conjunction expressed or understood.

NOTES.

I. The principal co-ordinate conjunctions are *and, also, or, nor, but, however, notwithstanding, yet, and for*.

II. Some common adverbial connectives in compound sentences are *again, besides, then, when, where, whence, on the other hand, for all that*.

III. A relative pronoun, or a conjunctive adverb, when it contains the force of *and*, may connect the statements of a compound sentence : thus—

1. I met General Jackson, *who* [and he] invited me to enter his headquarters.
2. At length the reinforcements arrived on the field, *when* [and then] the terrible struggle was renewed.

2. DIRECTIONS FOR ANALYSIS.

In analysing a compound sentence, mention the principal statements, and state what conjunction connects them ; then proceed to analyse the separate statements as in the analysis of simple sentences.

MODEL OF ANALYSIS.

Art is founded upon science ; and the former cannot exist, even in a rude state, without the latter.

This is a compound sentence. It is composed of the two statements or propositions, “ Art is founded upon science,” and “ the former cannot

exist, even in a rude state, without the latter." These statements are connected by the co-ordinate conjunction "and." The subject, simple and complete, of the first proposition is "art." The simple predicate is "is founded," which is enlarged by the adverbial phrase "upon science."

The simple subject of the second proposition is "former," which is enlarged by the adjective "the." The simple predicate is "can exist." It is enlarged by the adverb "not," and by the adverbial phrases "even in a rude state," and "without the latter."

Exercise 64.

Analyse the following *compound sentences* :

1. The country was rich, and the city was the centre of its wealth.
2. The man recovered from the bite, but the dog died.
3. The army must gain a victory, or our cause will be ruined.

12. Night's candles are burned out, and jocund day
Stands tiptoe on the misty mountain-tops,

LXI.—SYNTHESIS OF COMPOUND SENTENCES.

1. PUNCTUATION OF THE COMPOUND SENTENCE.

RULE I.—Closely connected principal statements, unless much contracted, are, in general, set off by a comma, and are always so set off when there are more than two principal statements : thus—

1. Napoleon Bonaparte was of Italian blood, and was a Corsican by birth.
2. I came, I saw, I conquered.

RULE II.—Loosely connected principal statements, when long or when subdivided by a comma, are separated by a semicolon : thus—

2. The Greeks were indebted to the Phœnicians for the alphabet; the Romans adopted the Greek alphabet with some changes; the Roman alphabet is the basis of our modern alphabet.

RULE III.—When a compound sentence is elliptical, the omission of the principal statement is marked by a semicolon before each of a series of clauses : thus—

England has to undergo the revolt of the colonies; [England has] to submit to defeat and separation; [?] to shake under the volcano of the French Revolution; [] to grapple and fight for the life with her gigantic enemy, Napoleon; [] to gasp and rally after that tremendous struggle.

RULE IV.—Principal statements and clauses are punctuated according to the rules for the simple and the complex sentence.

MISCELLANEOUS EXERCISES IN LETTER-WRITING AND BUSINESS COMPOSITION.

a. LETTER-WRITING.

Arrangement of a Letter.—The arrangement of the parts of a letter is important, and the following points should be attended to :

1. *The date* and the *place* where it is written. The day, month, and year should be given in full. Never date a letter merely by the day of the week ; as, “Monday morning.”
2. *The form of address* ; as, “Sir,” “Dear Sir,” “My dear Charles,” “My dearest Father,” according to the terms of intimacy between the writer and the person addressed.
3. *The narrative*, or letter proper.
4. *The subscription* ; as, “Yours truly,” “Yours faithfully,” “Your affectionate brother,” &c. (varying, as in No. 2, with the relations of the parties), and the *name* of the writer.
5. *The name of the recipient*.

SUPERSCRPTIONS AND SUBSCRIPTIONS.

The following superscriptions, subscriptions, &c., of letters are designed to show what is now regarded the most approved arrangement and style of these parts ; and they may serve as models, according to circumstances.

Some of the most common forms of address are, Sir, Dear Sir, My dear Sir, Reverend Sir, Sirs, Dear Sirs, Gentlemen, Ladies, Madam, Dear Madam, &c. ; Friend Brown, Dear Susan, My dear Friend, Mother, Brother, &c. ; according to the relations of respect, intimacy, or affection existing between the parties. Note that the form of address, *Madam*, *Dear Madam*, is applicable to all ladies, *married* or *unmarried*, *titled* or *untitled*.

The closing part may be Yours, Yours truly, Most truly yours, Very truly yours, Yours respectfully, Respectfully, Sincerely yours; Your friend, Obedient servant, &c.; Yours affectionately, Your affectionate friend, Your loving brother, sister, &c., followed by the name of the writer. The closing will vary with the relations of the parties.

Mr., Mrs., Miss, and Master are common titles, and should be used unless the person has a higher title. Messrs. and Misses are prefixed to the name of a firm, or to the names of persons collectively; and the name is followed by Sirs, Dear Sirs, Gentlemen, or Mesdames, as the case may be.

Medical men have the titles Dr. and M.D. The title Esq. is now given to almost every person of respectability, although originally used only for professional gentlemen and others of high social standing.

 Be careful never to use the form "*Mr. John Smith, Esq.*" Military men have the titles Gen., Maj.-Gen., Col., Capt., &c., according to rank. Graduates of colleges have some academic title, as B.A., M.A., LL.D., &c. Clergymen have the titles Rev., Rev. Dr., and if bishops, that of Rt. Rev., or archbishops, His Grace. Hon. is the proper title for members of the Senate or of the Provincial or Dominion Governments. His Honour for the lieutenant-governors of the various provinces, and His Excellency for the Governor-General of the Dominion. The following models may be varied by inserting the *address* after the *subscription* a little to the left-hand side:—

1. Heading or Date.

Toronto, Ont., Feb. 3., 1873.

2. Address.

Mr. James F. Hammond,

A.

PECULIARITIES OF NUMBER.

Indeterminate Forms.—A few nouns have the same form for the plural as for the singular. Among these are—

SINGULAR.	PLURAL.
sheep	sheep
deer	deer
grouse	grouse
salmon	salmon
heathen	heathen

In these indeterminate forms the number of the noun is to be inferred from the context: thus, “A *sheep* was feeding on the hill;” “*Sheep* were feeding on the hill.”

Double Plurals.—Some nouns have double plurals, each possessing a peculiar signification.

SINGULAR.	PLURAL.	PLURAL.
brother	brothers (by birth).....	brethren (of a community).
cloth	cloths (kinds of cloth).....	clothes (garments).
die	dies (stamps for coining).....	dice (for play).
genius.....	geniuses (men of talent).....	genii (spirits).
index.....	indexes (contents).....	indices (algebraic signs).
pea	peas (single ones).....	pease (collective).
penny.....	pennies (coins).....	pence (value or amount).
staff....	staves (common use).....	staffs (military term).
shot.....	shot (balls).....	shots (number of rounds).
fish ..	fish (collective).....	fishes (individuals).

Plurals as Singulars.—Some plural forms are usually treated as singular : as, *amends, gallows, news, odds, pains, wages*. So—

politics.....	} represent Greek plurals, but are now treated as singular. Thus, “Mathematics <i>is</i> an improving study ;” “Optics <i>is</i> the science of light.”
ethics.....	
physics.....	
optics.....	
mathematics.....	

Plurals only.—Some nouns, the names of things consisting of more than one part or forming a pair, have only the plural forms :

annals	entrails	scissors
antipodes	nuptials	shears
breeches	pantaloons	tongs
drawers	pincers	victuals
dregs	scales	vitals

Foreign Plurals.—Many foreign nouns, especially those that are imperfectly naturalised, retain their foreign plural.* (The plurals of such nouns are readily found by reference to a dictionary.)

	SINGULAR.	PLURAL.
(1) <i>Latin</i>	{ formula datum radius	formulæ data radii
(2) <i>Greek</i>	{ axis phenomenon	axes phenomena
(3) <i>Italian</i>	{ bandit virtuoso	banditti virtuosi
(4) <i>Hebrew</i>	{ cherub seraph	cherubim seraphim

* 1. Many Latin nouns adopted into our language retain their Latin endings :

Nouns in *us* (masculine) form the plural in *i* ; as, *focuz, foci*.

„ „ *us* (neuter) „ „ *era* ; as, *genus, genera*.

„ „ *um* „ „ *a* ; as, *stratum, strata*.

„ „ *a* „ „ *æ* ; as, *nebula, nebulae*.

„ „ *ex* „ „ *ices* ; as, *vortex, vortices*.

2. Some Greek nouns adopted into our language retain the Greek endings in the plural : thus—

Nouns in *is* form the plural in *es* ; as, *crisis, crises*.

„ „ *on* „ „ *a* ; as, *phenomenon, phenomena*.

Compounds.—With regard to compounds the following points are to be noted :

- I. The plural of compound nouns is generally formed by adding the suffix to the principal noun, that is, to the noun described : as, *fruit-trees, brothers-in-law, aids-de-camp.*
- II. When the last part of a compound is an adjective (according to the French idiom), the suffix is usually added to the noun : as *attorneys-general, courts-martial.*
Knights-Templars pluralises both parts ; as do also, *men-servants, women-servants.*
- III. When the words are so closely allied that the meaning is incomplete till the whole is known, the plural sign is added at the end : as, *forget-me-nots.*

B.

SYNOPSIS OF A REGULAR VERB IN THE SECOND PERSON SINGULAR, OLD STYLE.

Indicative....Thou lovest, thou lovedst, thou shalt *or* wilt love, thou hast loved, thou hadst loved, thou shalt *or* wilt have loved.
Potential....Thou mayst love, thou mightst love, thou mayst have loved, thou mightst have loved.
Subjunctive..If thou love, if thou loved.

C.

MODEL OF CONJUGATION OF IRREGULAR VERBS.

FORMS OF CONJUGATION.

Besides the common style of the verb, several special modes of conjugation are used to express particular meanings. The principal of these are : (1) THE PROGRESSIVE. (2) THE EMPHATIC. (3) THE INTERROGATIVE.

I. Progressive Form.

The progressive form of a verb is that which represents the continuance of the action or state asserted by the verb : as, "*I am writing ;*" "*He was sleeping.*"

The progressive form of a verb is made by combining its present participle with the variations of the auxiliary verb *to be*.

II. Emphatic Form.

The emphatic form of a verb is made by joining *do* and *did* with the infinitive (without *to*) : as, "*I do learn ;*" "*I did learn.*"

This combination is found only in the present and the past indicative (active), and in the imperative.

Present.—I do learn, thou dost learn, he does learn, etc.

Past.—I did learn, thou didst learn, he did learn, etc.

Imperative.—Do learn.

III. Interrogative Form.

The interrogative form is that which is used in asking a question : as, "Can he see ?" "Shall he be punished ?"

This form is used in the indicative and potential moods.

I. A verb is conjugated interrogatively by (1) placing the subject after the verb : as, "Hearest *thou*?" or (2) by placing the subject between the auxiliary and the verb : as "May *we* go?" or (3) by placing the subject after the first auxiliary when two or more auxiliaries are used: as, "Could *he* have called?"

II. In common usage, the present and the past of the indicative mood are rendered interrogative by the use of *do* and *did*, with the subject following : as, "Do you hear?" "Did you hear?"

LIST OF IRREGULAR VERBS.

Explanation.—When a verb has a past or past participle, or both, of the regular conjugation, this fact is indicated by placing *-ed* after the form or forms. This *-ed* is to be suffixed to the root, care being taken to observe the rule of spelling for derivative words.

When the **-ed** is in heavy type, it indicates that the **-ed** form is preferable.

The forms in *italics* are either out of use, seldom used, or not used by the best authors.
